

# Mira Connect Software and AV Control for Municipal Applications

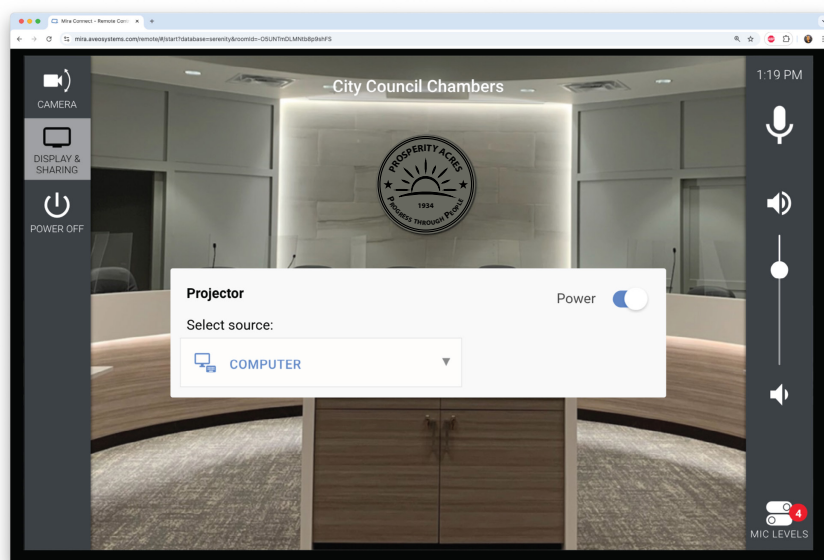

Aveo Systems' Mira Connect AV Control is available as a software application, making it easy to control the audio-visual systems in municipal spaces from a variety of user interfaces.

Access a Mira Connect systems' user interface from a browser on a computer or any mobile device using the [Remote Control](#) feature.

Mira Connect's controls can also be easily added to third-party interfaces, including customizable Elgato Stream Deck controllers, push-button keypads, and other devices and applications.

*Give the Mayor, City Clerk, and guest presenters the tailored AV control they need for effective meetings.*

An example browser user interface for selecting video sources, controlling cameras, and muting and adjusting volume levels for different audio sources.

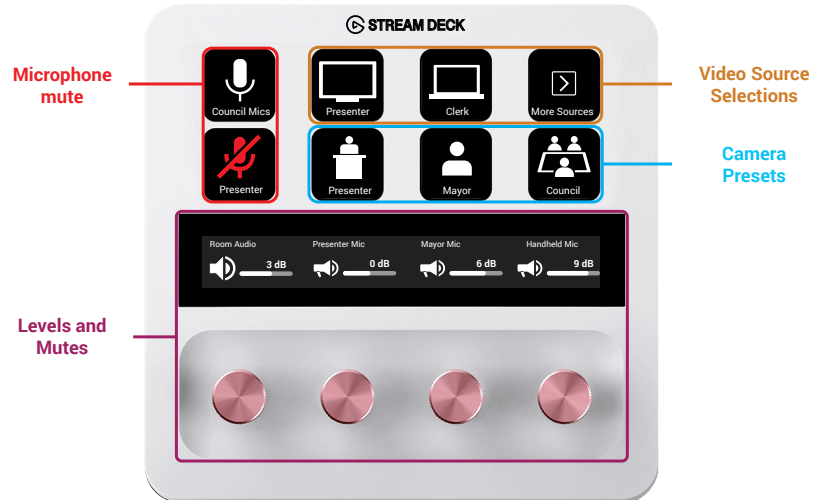

Mira Connect includes drivers for thousands of AV products from leading manufacturers, making it easy to configure a system to control audio equipment, displays, projectors and projector screens, cameras, and much more – without any programming.

As a low-cost, user-friendly interface, Elgato Stream Deck controllers with their large buttons and dials can be easily customized to control any Mira Connect function.

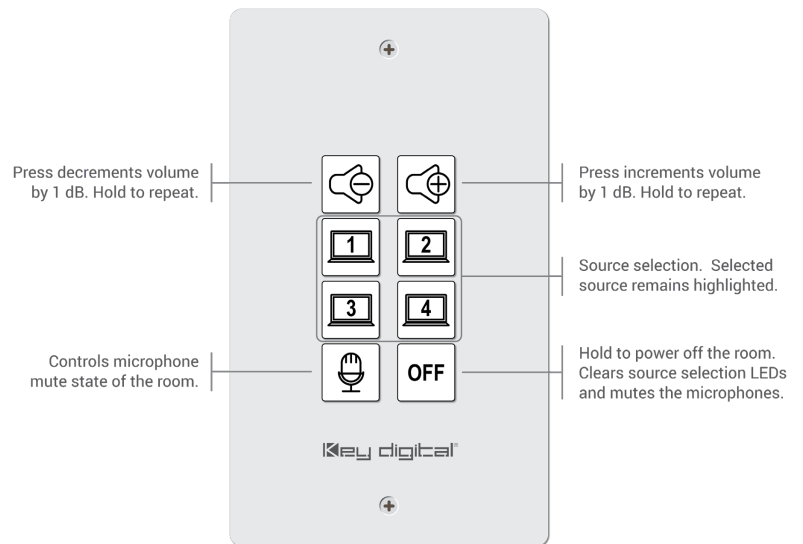

To learn more about using Stream Deck devices to control Mira Connect Software, including how to configure the system, see our [Stream Deck](#) article.

You can also add network-enabled, push-button keypads to control a Mira Connect Software system. Mira Connect makes it easy to create custom keypad configurations, assigning audio and video control features to buttons.

See our [keypad application note](#) for additional information.
